

Green Post Project Closing event
Szentendre, Hungary
15 June 2010

Magyar Posta organized its national closing event of the Green Post Project in Szentendre on 15 June 2010. All participants of the project were invited to the same location where the project launching event was organized, so the project team, the postmen from Szentendre, the subcontracting partner from the Budapest Technical University and the representative of the City of Szentendre were present. Dr. Sándor Horváth, leader of the project at Magyar Posta summarized the past 30 months in regards of the project's activities, the outcome and results that were collected by other project partners and the Hungarian delivery colleagues. Mrs Katalin Molnár, Postmaster of Szentendre Post Office talked about the positive effects the alternative delivery vehicles brought to the city's life and to the postal activities as well. She highlighted what a great opportunity was for their postal team to participate in an EU-funded project and how enthusiastic postmen delivered the postal items with the green vehicles. Mr. Balázs Trencsényi from the University pointed out that this project co-operation was extremely useful for them as well as, since they had the possibility to link their scientific background with the everyday practise and test alternative vehicles in many aspects. The results received would be extremely beneficial for their future scientific researches as well. Finally Mr. Horváth thanked all project members for their devoted work and congratulated them on the successful project closure. The event was finished with the last chance of testing and driving the alternative delivery vehicles on the streets of Szentendre.
